Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

The following action is in response to application 10/525,853 filed on February 25, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Reynoldson '322.

With regard to claim 7, Reynoldson teaches a transmission for a motor vehicle, having an input shaft 1, output shaft 2, and at least one countershaft 3, the transmission comprising at least one direct gear (via 20), having a downstream arranged area group 11/10, the input shaft 1 of the downstream arranged area group can be directly connected to the output shaft 2 of the downstream arranged area group, and parts that are not involved in power flow in the direct gear are designed such that the parts can one of be engaged or disengaged (Fig. 1).

With regard to claim 8, Reynoldson teaches the transmission, wherein the input and output shafts 1,2 can be directly connected by means of a connecting element 20.

Please Note: the “downstream arranged area group” is read as any group within the transmission downstream of the input. If the applicant wishes to claim the specifics of the embodiment of Fig. 3 (which appears to be the case) applicant must be clear that the countershaft is part of a main transmission, per se, since there is no countershaft for the transmission in Fig. 3. Also, if the “downstream input shaft” is different than the main transmission input shaft, then

Art Unit: 3681

applicant must introduce the limitation as a new limitation (which is not the case in claim 7).

Also, it is believed that Fig. 3 is not in addition to the transmissions of Figs. 1 or 2. Applicant is invited to point out the portion of the specification that would support this.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Beattie and Milbradt have been cited to show similar transmissions.

FACSIMILE TRANSMISSION

Submission of your response by facsimile transmission is encouraged. The central facsimile number is (571) 273-8300. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Responses submitted by facsimile transmission should include a Certificate of Transmission (MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to the Patent and Trademark Office (Fax No. (571) 273-8300) on _____ (Date)

Typed or printed name of person signing this certificate:

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.
